CSA has accomplished much this year through the combined efforts of the students and faculty. Many changes have been brought about, benefitting the entire Clarke student body. Now is not the time to lose student interest and enthussiasm in our community. The momentum gathered this year can be carried over to next year to bring about new policy. Now, more than ever, the student body has been given a voice in school policy. We have to use our voice and keep working for the good of Clarke.

-editorial opinion-

by: darlene gingher

"Boy, I'm glad I'm not in the English department!" "Did you hear about what happened in the Psych department?" These comments are not unfamiliar to students at Clarke these days. Especially seniors are concerned about the validity and fairness of their senior performances or compre-

The Clarke catalogue does not define what a senior performance is, stating only that it is necessary to graduate. No two departments have duplicate types of comprehensives, but all have at least one of three things in common. (The data for this editorial was gathered from the following departments: art, biology, chemistry, drama, English, French, history, math, music, psychology, Spanish and sociology.)

Seven of the 12 departments require as part of their comprehensives the U.R.E. (Undergraduate Record Exam) or G.R.E. (Graduate Record Exam). The scores for passing are determined by the department faculties. The test is standardized and covers all areas of a subject. For example, the history exam covers American, Western and Non-western history. The psychology exam covers material from eight divisions of psychology.

Four of the 12 departments use a performance comprehensive as at least part of their senior performance schedule. For example a French or Spanish major might select a literary period, prepare an oral report and be questioned on their presentation. Music majors can give a performance of piano literature at a recital or they can do a major research paper and give a minor performance.

Only two departments use a third type of test-an over-all exam made up by the department faculty. The test is usually a combination oral and written comprehensive. Art majors must pass four parts of their comp. In one they must date, define and give the historical significance of 20 terms in 40 minutes. In another, they must give the title, artist, country, period, style and medium used in selected Art History slides. They also have one large essay plus questions on specialty courses they might have taken such as pottery or printmaking. English majors must orally answer questions about books selected from a department reading list and make comparisons to other works of the period.

Of the three categories, no one type of comprehensive is most successful or eas-

ier to pass. This year, all the history majors passed their U.R.E. comps but only a few of the ten psych majors passed theirs. The psych majors complained that Clarke only offers two of the eight areas of psychology the exam covered. English majors have complained that their test covers works that were not even mentioned in their survey courses.

Another problem is the anxiety accompanying an exam a student must pass in order to graduate. These psych majors who did not pass their comprehensives must face another exam with the knowledge that if they fail again, they may not graduate. English majors are even more perplexed because their exams are not scheduled until four weeks before graduation this year.

The term senior performance connotes a test that covers study in a major area. The non-performance comps are not designed for the individual. For instance, even though a history major can concentrate heavily on Western Civilization, her U.R.E. that year may be up to 75 percent American History. Also, these comps often test how much one can cram in a short period of time before the exam and do not, therefore, really evaluate what a student has learned in four years.

Moreover, statistics from previous years prove a high grade point does not always correlate with high standardized test scores. Last year, a biology major flunked her U.R.E. but received a grant for masters work and is doing very well. Also, in chemistry, a girl who flunked her U.R.E. graduated summa cum laude. Sr. Marguerite Newman, chairman of the Chemistry departmnt stated, "A student who can get through four years of chemistry has got to have something on the ball. She can always do well on a job no matter what she does on her comprehensive."

In summary, the need for some type of performance does exist-agreed. It can be a good review and a rewarding experience. The performance should be determined by the individual departments since no two disciplines are exactly alike. But the test should not be a requirement for graduation as it puts extreme emphasis on an exam which is not always fair and does not always represent a mastery of the student's individual area of study.

We suggest the Academic Affairs Committee evaluate this situation as soon as

President Requests Student Aid

by: cathy schulze

Financial aid is a big factor involved in drawing students to Clarke. Previously, a student with financial need and academic ability was given financial aid after she was attracted to Clarke. As of Feb. 15, 1972, a student may possibly be attracted to Clarke because of an offer of financial aid.

Effective immediately, Clarke will award five \$4,000 four year Presidential Scholarships to prospective freshmen. \$1,000 will be awarded the first year and each year thereafter provided that the student maintain a 3.50 grade point average. The criteria for presenting these scholarships will be determined by an Awards Committee composed of administrators, faculty and students appointed by the President and chairman of Forum who will meet during September each year. Forum will receive the criteria for bestowing Presidential Scholarships for the following year by Oct. 1.

Because of the situation that has arisen in attracting students from Dubuque and the surrounding areas, this year the President will select candidates for these awards from within a radius of 50 miles of Clarke. In addition, Clarke will guarantee a full financial aid package to eight prospective freshmen who are minority students with need. Their aid will be renewable yearly as long as they remain in good academic standing.

Scholarships are "gift" money, whereas the "full financial aid package" may include Clarke Grants, Educational Opportunity Grants, National Defense Student Loans, Iowa Tuition Grants, Campus Positions Work-Study Programs Fine Arts Scholarships and bank loans. Because Clarke gets more money from Federal and State sources for minority students, it would seem feasible that there will be more available money for freshmen. Clarke could not possibly finance full financial aid packages for everyone.

Previously, recipients of scholarships and financial aid had to prove financial need plus demonstrate academic ability. The new Presidential Scholarship and finan. cial aid package move away from the idea of financial need. The funds used for these bestowals comes from money already allocated to freshmen; it is not money belonging to the upperclassmen. Therefore, there will be no decrease in funds available to all other students.

Forum has passed this presidential proposal and Clarke can now provide more money to aid more students. Because of this aid currently available, more girls will have the chance to further their education whereas financial complications may have prevented it in the past.

The Courier has been awarded a Newspaper of Distinction rating by the Catholic School Press Association for the year 1971. Publications of Distinction scored 900 or more of a possible 1000 points.

visit opens curtain peking

enter: the door is open

A great journey has been made. Just as the Great Wall of China was built to keep barbarians from entering, so was the Great Door of Communication opened wider last week allowing President Nixon to visit the People's Republic of China.

Regardless of one's political tendencies, the events in Peking last week offered an extraordinary educational opportunity for Americans who have been deprived of information from the Mainland for nearly twenty-five years.

However in view of all expectations that had been built up for the President's visit, his arrival at Peking Airport was a letdown for people who might have expected something a little more exciting. The ceremonies at the airport provided a definite contrast to the fanfare that had been given to this trip from our side of the Ocean. There were no speeches, no hand-waving, no massive crowds, no political posters and no incidents to detract from the arrival of the President of the United States on Mainland

China soil for the first time in this century. Most historic of the events during Nixon's of the American National Anthem by a band from the host country. This was followed by the playing of the Chinese National Anthem.

It was, in short, a "low-key" performance to borrow a phrase President Nixon has used on occasion to describe his strategy toward a particular problem or situation. Two commentators had the same observation about Nixon's arrival and the reception given to newsmen who covered the trip. Walter Cronkite of CBS and Harry Reasoner of ABC observed that there was "correctness" about the demeanor of the Chinese who were involved in face-to-face meetings with Americans.

Perhaps such a "correctness" is viewed as being a little dull for many Americans who are usually impressed more by sensational events than those which are more ordinary. Granted, this is no ordinary mission—the attempt by the United States to re-establish normal relations with the People's Republic of China after more than two decades of isolation. The seriousness with which both sides approached the week of high level diplomacy was in evidence as it all began with the handshake between Nixon and Premier Chou En-lai.

There is much to be said for the advisability of having President Nixon visit Peking and lay the framework for improved relations between this country and China. From all indications the Chinese were gracious hosts, making it easier to discuss some of the extreme ideological differences that exist between the governments and the people of each nation.

The experiences of the Nixons, the press corps which accompanied them and the millions in this country who followed the events closely give new promise for the future relationships of the two countries. What has happened the past several decades cannot be changed. The future can and must be different and better. There are still diverging viewpoints but, as the President said in his toast to Chou En-lai on Feb. 21, the gap can be bridged "so that we may be able to walk across it." Education will help

us take that step. Reception of the Nixon trip has been cordial in Congress. Some right-wing Republican-oriented groups are protesting the change in policy toward China. On the other hand, left-wing organizations are insisting that any appearance of good will between capitalists and Communists breeds ills for the latter group. This has prompted the observation that Nixon must be following a course near the middle of the road. I view that it is much closer to the middle than it was four years ago, placing Richard Nixon in an excellent position for re-election to a second term.

letters to the editor ask student notification before decision-making

This Calendar (1972-73 academic year) was approved for the Dubuque colleges by the Executive Board at its Feb. 1 meeting.

Class Days: 73; Exam First Semester Days: 4, Study Day: 1. Registration Aug. 26 Sat. Aug. 28 Mon. a.m. Classes begin Aug. 28 Mon. 12:10 Labor Day free day Sep. 4 Mon. Oct. 9 Mon

Tri-College Free Day Thanksgiving recess begins Nov. 22 Wed. 12:10 p.m. Classes resume Nov. 27 Mon. 8:20 Study Day Dec. 15-19 Fri.-Tue.

Exams

Class Days: 73; Exam Second Semester Days: 4; College Day: 1. Registration Classes begin Tri-College Free Day Spring Recess begins Classes resume Easter recess begins Classes resume College Day Exams Graduation

Tue. Jan. 10 Wed Feb. 12 Mon. Mar. 2 Fri. 5:10 p.m. Mar. 12 Mon. 8:10 a.m. Apr. 18 Wed. 9:00 p.m. Apr. 24 Tue. 8:10 a.m May 4 Fri. May 7-10 Mon.-Thu.

May 12 Sat. We feel this schedule results in several problems to all those involved with Dubuque's three colleges. All of these problems seem to arise from the spring recess.

1. The combined Christmas vacation-Semester Break will again be shortened, with registration beginning Jan. 9. Besides the brevity of this recess, it will also make it difficult for those students seeking employment during this period. We therefore feel that a longer vacation is more desirable, practical and necessary.

2. The Easter recess is likewise shortened to five days. Many students plan vacations during this period and the brief recess makes such plans nearly impossible.

3. There is the added inconvenience and expense of travelling home for these two vacations. This is a hindrance particularly to those living a considerable distance from

4. The question thus arises, what effect will spring recess have upon those students teaching in the Dubuque Community Schools which have no break at this time?

5. The January Interim that has been under consideration will be delayed at least another year in implementation.

This calendar was presented to AAC after it had been approved, making any action upon it impossible. Because of the effect this change in schedule will have on the students and faculty, it is our contention that they should have been notified that such a schedule was under considera- first moments in Peking was the playing tion before the decision was made and subsequently involved in the decision-making process. We likewise urge that if a reconsideration of the calender is possible that it be done immediately.

barbara mills larkin, academic affairs diane c. diamond, c.s.a. representative rita leitelt, academic affairs denise baffoe, forum lori ritz, forum

editors note:

The question raised in this letter was discussed at the Feb. 15 Forum meeting. Sr. Helen Thompson, Academic Dean, commented that the only significant difference in next year's calendar is the 10-day vacation early in March instead of a long Easter vacation. This was planned because of the late date of Easter next year. Student teachers will follow the college calendar. Christmas vacation is the same and should not create the job problems mentioned.

Sr. Helen said the calendar for the following academic year is submitted sometime around Oct. 15. So if anyone is considering suggesting changes or an interim program, RIGHT NOW is the time to think

by the Clarke College drama de- her relations with her sister Chryspartment. An innovative produc- othemis and the women of Argos tion, electronic music and modern and the general effects the continudress help span the centuries from ous persecution have had on her

The play is based on the legend on his return from the Trojan War lover Aegisthus. Their daughter Ellows: ectra saves her brother Orestes by sending him away secretly with an old friend.

For years she is tormented and kept prisoner in her mother's and Aegisthus' house. Her only hope is that someday Orestes will return to help her avenge their father's murder. Orestes' possible return is the only terror that haunts the two murderers.

Electra is the main character under study in the play: how she

is dominated and driven by the one Sophocles' Electra is being pre- hope of righteous vengeance. The make it an interesting psychological study-and an interesting play.

Electra is directed by Michael Pisoni, with Barbara McKay assistant director. The cast is as fol-Electra: Kris Kuebler
